Adults (21 or older) with:
• Nucleus (N24, Freedom, or N5) cochlear implants are invited to take part in our research.

Criteria:
Use of device for at least 6 months

Participants from the area typically attend 2-hour sessions at our facilities in College Park, MD. Participants that travel typically plan day or multi-day visits.

Do you wear a Nucleus cochlear implant?

Help us learn more about:
How the brain processes temporal information
How aging affects use of your implant
Designing better speech processing strategies
